EDUCATION

• Stevens Institute of Technology

Hoboken, NJ

Bachelor of Science in Computer Science; GPA: 3.7

August 2024 – May 2028 (Expected)

- **Relevant Coursework:** Multivariable Calculus, Vectors & Matrices, Discrete Structures, Data Structures, Algorithms, Computer Architecture, Linear Algebra, Probability & Statistics, Principles of Programming Languages, Intermediate Statistics, Systems Programming, Database Management Systems
- **Involvement:** Cyber Defense Team (*Secretary*)
- **Honors & Awards:** Presidential Scholarship, Edwin A. Stevens Scholarship, Upsilon Pi Epsilon
- **Research Interests:** AI agents, human-AI interaction, machine learning systems

EXPERIENCE

• Property Panda

Hybrid

Founding Engineer

April 2025 – Aug 2025

- Built an all-in-one, AI-powered home listing management tool that cut home listing creation time by 50%.
- Collaborated regularly with 5+ clients and ten other engineers to improve the product and implement new features.
- Used React, Python (Flask), and Node.js to build image processing APIs and frontends that provided helpful metrics to realtors and improved home listing response rates.

• Code Ninjas

Norwood, NJ

Lead STEM Instructor

November 2021 – July 2024

- Taught 75+ children ages 4 to 14 years old how to code through a video game development curriculum that rewards level progression with simulated karate belts.
- Managed and trained a team of seven instructors to work with students as they familiarized themselves with the Code Ninjas curriculum.

• Technology Student Association

Project Manager & Head Developer, Video Game Development Team

2020 – 2024

- Created weekly agendas for twelve team members and three sub-teams, keeping members on task with regular check-ins and feedback. Represented the team as a captain at the annual New Jersey State TSA Convention.
- Implemented complex 2D and 3D video game programming logic.

PROJECTS

• LightningLearn: Next.js, Golang, PostgreSQL, Google Agent Development Kit, Gemini, Stripe

- A course-building platform that uses agentic AI to improve teacher workflows.
- Built LLM-based agents to help teachers edit courses, create rich supplemental content, and grade student quizzes.
- Wrote a scalable backend framework in Go to handle task scheduling, secure payments, and authentication.

• Gesture Recognition Model: Python, Keras, TensorFlow

- A hand gesture recognition model that can recognize over 20 unique gestures, trained using the 20bn-Jester Dataset with a 3D Convolutional Neural Network.

• Arctic OS: Bash, C, C++

- An Arch-based Linux distribution with a graphical installer, made for educational purposes.
- Used Archiso to build a bootable ISO image, designed a custom welcome application in GTK in C++, created and maintained a custom package repository.

• TypeTest: HTML, CSS, TypeScript, Vue.js, Supabase, Docker, CI/CD

- A web application that can analyze typing statistics such as WPM and accuracy in detail.
- Implemented secure authentication and scalable database storage using Supabase.
- Designed a modern, interactive user interface using Vue.js.

SKILLS

• Languages: HTML, CSS, JavaScript, TypeScript, C, C++, Python, Rust, Go, Java

• Frameworks: React, Vue, Astro, Hugo, Vite, Tailwind, Next.js, Express, NestJS, Prisma

• Tools: Docker, PostgreSQL, MongoDB, Git, Linux
